navigation facilities, and any other structures, equipment, and related improvements; and to erect, install, construct and maintain at those airports facilities for the servicing of aircraft and for the comfort and accommodation of air travelers and the public; and the fiscal body of the entity may by ordinance provide that any land suitable for these purposes that is owned by the entity shall be put under the control of the board of aviation commissioners for aviation and public purposes. However, if at the time of the creation, appointment, and qualification of the board in an entity, the entity owns or controls an airport, landing field, or other air navigation facilities, then the exclusive control, management, and authority over the airport, landing field, or other air navigation facilities shall at once be transferred to the board without the adoption of an ordinance; and the department, board, officer, or officers of the entity, or other persons having possession or control, shall at once turn over and deliver to the board all personal property, records, books, plans, maps, and other papers and documents relating to the aviation business of the entity. The unexpended balance of any fund or funds appropriated by the entity for aviation purposes becomes a part of the aviation fund of the department of aviation. Before land may be purchased by an entity for the establishment of an airport or landing field or an airport or landing field may be established by an entity the action or acquisition of land must be granted by the aeronautics commission of Indiana.

(2) To elect a secretary from its membership or to employ a secretary, and to employ superintendents, managers, engineers, surveyors, attorneys, clerks, guards, mechanics, laborers, and all employees the board considers expedient, and to prescribe and assign their respective duties and authorities and to fix and regulate their compensation, in accordance with the appropriations made by the fiscal body of the entity. All employees shall be selected irrespective of their political affiliations.

(3) To make rules and regulations, consistent with law, for the management and control of its airports, landing fields, air navigation facilities, and other property under its control. The board may require a special detail of police or hire guards to execute the orders and enforce the rules and regulations.

2 (5) To manage and operate all airports, landing fields, and other

9 public recreational facilities that will not interfere with air
10 operational facilities; to fix, charge, and collect fees for public
11 admissions and privileges; to make contracts for the operation and

15 its own employees, or otherwise. Contracts or leases for the
16 maintenance, operation, or use of the airport or any part of it may
17 be made for a term not exceeding fifteen (15) years, and may be
18 extended for similar terms of years, except that any parcels of the
19 land of the airport may be leased for any use connected with the
20 operation and convenience of the airport for an initial term not
21 exceeding forty (40) years, and may be extended for a period not
22 to exceed ten (10) years. If a person whose character, experience,

26 on land belonging to the airport. A lease may be entered into for
27 a period not to exceed ninety-nine (99) years. However, the fiscal
28 body must pass an ordinance authorizing the board to enter into
29 such a lease. The board may not grant an exclusive right for the
30 use of a landing area under its jurisdiction. However, this does not
31 prevent the making of leases in accordance with other provisions
32 of this chapter. All contracts and leases are subject to restrictions
33 and conditions that the board prescribes.

34 (6) To sell machinery, equipment, or material under the control of

(10) To construct drainage and sanitary sewers with connections and outlets as are necessary for the proper drainage and maintenance of an airport or landing field acquired or maintained under this chapter, including the necessary buildings and improvements and for the public use of them, in the same manner that the eligible entity may construct sewers and drains. However, with respect to the construction of drains and sanitary sewers beyond the boundaries of the airport or landing field, the board shall proceed in the same manner as private owners of property and may institute proceedings and negotiate with the departments, bodies, and officers of the entity to secure the proper orders and approvals.

(11) To order a public utility or public service corporation or other person to remove or to install in underground conduits, wires, cables, and power lines passing through or over the airport or landing field or along the borders or within a reasonable distance that may be determined to be necessary for the safety of operations of the airport or landing field, upon payment to the utility or other person due compensation for the expense of the removal or reinstallation. The board must consent to any franchise granted by state or local authorities for the construction or maintenance of any railway, telephone, telegraph, electric power, pipe, or conduit line upon, over, or through land under the control of the board or within a reasonable distance of land that is necessary for the safety of operation. The board must also consent to the installation of overhead electric power lines carrying a voltage of over forty-four hundred (4,400) volts and having poles, standards, or supports over thirty (30) feet in height within one-half (1/2) mile of a landing area acquired or maintained under this chapter.

(b) If the board negotiates an agreement to sell trees situated in woods or forest areas owned by the board, the trees are considered to be personal property of the board for severance or sale.

extended for similar terms of years, except that any parcels of the land of the airport may be leased for any use connected with the operation and convenience of the airport for an initial term not exceeding forty (40) years, and may be extended for a period not to exceed ten (10) years.
